AUDITOR'S REPORT

This is to certify I have audited the accounts of the town officers of Surry and find them to be correct to the best of my knowledge, with vouchers therefor. .

FRANK B. KINGSBURY,
Town Auditor.

Feb. 22, 1923.

REPORT OF SUPERINTENDENT OF SCHOOLS

To the School Board and Citizens of Surry :

I submit my fourth annual report as superintendent of schools for the supervisory union number 38.

I. SCHOOL PROGRESS. In the district as a whole the progress of the schools during the school year 1921-1922 was fairly satisfactory. Every school in the district was open for the required thirty-six weeks. The teachers were, with a few exceptions, well qualified and did good work. The attendance was about the same as the state average. The number of pupils who failed of promotion to the next grade was small.

This year all schools opened on schedule and have suffered no interruptions up to this time. There was the usual number of changes in teachers, amounting to nearly one-half the whole number in the district, but the average quality of teachers is better than we have had in any year since the close of the World war. Attendance so far is even better than it was last year, except in a few localities where heavy snow has made it difficult for pupils who have long distances to go. The average attendance for the district for September was 96.3 per cent, for October the same; for November 98.2 per cent; and for December and part of January 96.8 per cent.

Improvements have been made this year along several lines: (1) The general guidance of teachers in organizing their schools has been made more effective and reports are required at frequent intervals showing the progress and quality of the work in all classes as well as attendance. (2) A new series of arithmetic texts has been introduced and for supple-

mentary material the Studebaker Practice Tests provide practice in the four fundamental processes in an efficient and economical way. (3) The Houston method of writing, which was introduced last year on trial, has been extended to all the schools with full equipment of copy books and the results are apparent in an improvement in the quality of handwriting. (4) A spelling book is now in use that is not merely a list of words; it was prepared from a careful study of actual needs and the words are carefully graded, and an economical method of teaching is emphasized. (5) The new series of Geography texts by Brigham and MacFarlane brings instruction in that subject up to date, both the maps and the text having been revised since the World War.

II. TEACHERS. The shortage of teachers existing throughout the state since the war has been relieved to a great extent; there are teachers enough to go around, but we have filled out the ranks with a larger number of girls just out of high school with only one summer school session for professional training. The Normal Schools provide each year less than half enough trained teachers to meet the needs of the state, so that it is not possible to secure teachers for the rural schools from that source. Increased facilities at the Normal Schools, with the proposed new dormitories, is an imperative need.

Salaries have advanced somewhat year by year and the salaries of good teachers ought not to be less at any time than they are now, but the inexperienced and untrained teachers are paid too much in proportion. We must pay a living wage to all teachers employed but we ought not to pay one who has invested neither time nor money in preparation for her work as much as we pay one who has spent several years in special training.

We need just as good teachers in the rural schools as in the village schools, and in the state aided towns we can pay

them as much as the village teacher—when we can get the trained teacher.

III. SCHOOL FINANCES. It is the intent of the school law that was enacted in 1919 that the local expenditures for elementary schools throughout the state should be equalized. The following table shows to what extent this has been realized in the eight towns of this district, and the figures are fairly representative of the situation throughout the state. The figures are for the school year 1921-1922.

	Position in list of 256 towns	Elementary school cost per \$1,000	State aid payments per \$1,000	Local expenditure per \$1,000
Sullivan	16th	\$12.30	\$7.37	\$4.93
Marlboro	23rd	9.98	4.27	5.71
Gilsum	27th	11.60	5.59	6.01
Surry	152nd	6.85	.44	6.41
Harrisville	189th	5.56	.01	5.55
Stoddard	196th	6.02	none	6.02
Roxbury	201st	5.59	none	5.59
Nelson	228th	4.31	none	4.31

The table should be read as follows: In the list of 256 school districts in the state, arranged according to the expenditures per \$1,000 of equalized valuation for all school purposes in 1921-1922, Sullivan (for example) stood 16th, and the cost of elementary schools was equivalent to a tax of \$12.30 per \$1,000; of this amount the state paid \$7.37 in state aid, and the district paid \$4.93. (Surry and Harrisville did not receive the full amount for which their budgets were approved because the legislature of 1921 did not appropriate enough to meet all the approved budgets.)

With improvements in the administration of the law with further experience, and especially if the legislature should make its appropriations large enough to meet all approved

demands, we may expect to find that local expenditures for maintenance of elementary schools will "level off" more nearly at a uniform figure that will be somewhat above \$5.00 per \$1,000.

In estimating the amounts necessary for the district to raise at the coming March meeting, the school boards should have the figures of the above table in mind and where necessary ask for more than the five-dollar tax. The amount of state aid to be allowed for next year cannot be known definitely until the legislature has passed the appropriation bill, but the State Board of Education has asked for a sum that will provide for the approved demands of all the districts as determined from the budgets submitted last September.

The amounts needed for the school year 1923-1924 (see the school board's estimates) may be divided into two groups; one group will consist of the statutory requirements for high school tuition and per capita tax to be assessed by the selectmen without any vote of the district, and the "excess salary" of the superintendent which is determined by the joint school boards of the district in May; the other group consists of the salaries of district officers and the general appropriation for support of schools, the estimates for which are subject to change by vote of the district at its March meeting.

It is not possible at this writing to make a definite statement in regard to state aid for next year, because the legislature has not yet taken up the appropriation bill. The State Board of Education has asked for an amount that will meet the approved demands of all the towns asking for state aid this year, and if the legislature does not reduce the amount there is no reason why you should not receive the full amount that can be approved on your budget, or a little over \$500. The situation this year is of course the same as it was last year, as was explained in your school meeting. The amount

of the deficiency last year appears in the financial report and was covered by your deficiency appropriation of \$225. The amount received from the state this year was \$86.70, and it appears that there will be a deficiency of approximately \$300 in the elementary school account. Last year's estimate for high school tuition was not large enough by \$165, so that we have to ask the selectmen to raise that amount as a deficiency.

IV. SCHOOL NEEDS. While the state aid situation is so uncertain as it is at present, for towns as near the bottom of the list as Surry happens to be, I do not wish to urge upon your consideration any specific plans for the future that will involve large expenditures, but I wish simply to suggest for your consideration again the possible consolidation of your schools. The distances children would have to be transported would not be too great in any case, and the advantages to be secured by consolidation, with a two-room building and a teacher for upper grades in one room and for lower grades in the other, would be very great. The expense of maintenance would not be materially larger, if indeed a saving could not be effected, but you have no building that would accommodate such a school at present.

Respectfully,

VERNON S. AMES,
Superintendent.

Marlboro, N. H., February 15, 1923.

REPORT OF SCHOOL BOARD

STATISTICAL REPORT FOR SCHOOL YEAR 1921-1922

Number of pupils registered in school in town,	47
Number of pupils registered in school elsewhere,	5
Number of non-resident pupils registered here,	3
